

# When rust is the problem, get Matrix Rust Eradicator.

An **ESSENTIAL** in any cleaner's **SPOTTING TOOLBOX**.

Rust stains in residential and commercial settings are unsightly and can quickly create a negative impression. They are often caused by leaky windows, wet toys, furniture, and other sources throughout the home or office.

Experienced carpet cleaning professionals know that the only thing worse than a rust stain, is an old rust stain. That's why Matrix chemists created Rust Eradicator, a powerful formula specifically designed to not just remove rust stains (*new or old*), but to eradicate them completely.

Rust Eradicator can also be used to remove rust stains on ceramic and porcelain tile, too.

Rust Eradicator is a ready-to-use spotter that is part of the Matrix Professional Spotting Kit. Simply apply, agitate, and clean with an alkaline detergent or pre-spray such as Matrix Confidence or Matrix Finish First. Professional spot removal doesn't get any easier than this!

## Included in the Matrix Professional Spotting Kit

Other spotters included in the kit: ASR (Advanced Stain Remover), Red Be Gone, Target Tannin, Breakdown POG, Spot Out, Orange Power Gel, Release, Ink Away, and Reducing Agent. The spotting kit also includes a very easy to understand, step-by-step spotting chart that makes removing tough stains a breeze.

**#1 ON RUST STAINS.**

# MATRIX™

## Examples and Usage Instructions

### Problem: Rust on carpet.

What you'll need: Matrix Rust Eradicator, Bone Spatula, and Extractor.

What you'll need

Apply Rust Eradicator to stain

Agitate

Continue to agitate. Notice the foaming action.

Rinse and extract

Rust stain gone. Happy Customer!

pH: 0.5 -1.0

### Usage Instructions:

1. Use Rust Eradicator to remove rust stains prior to cleaning. Rust Eradicator will suds up slightly and must be rinsed with an alkaline detergent or pre-spray (such as Matrix Confidence or Matrix Finish First), or with ammonia. By removing rust stains prior to cleaning, you can easily rinse and remove suds without an extra step.
2. Shake well before using.
3. Apply Rust Eradicator liberally to dry stain. Agitate with a bone spatula. Allow to dwell for two minutes or until stain is gone.
4. If not cleaning following spotting, rinse with clear, hot water and neutralize with ammonia or other alkaline spotter.
5. Repeat steps 1-4 until stain is gone.

### Note:

Always test product in an inconspicuous area before using.
