Important Safeguards

- Do not operate equipment while standing on wet or damp surfaces or near water.
- Follow all warnings and cautions marked on the product and enclosed labels.
- Do not use the product near water or in a wet environment.
- Operate equipment only with the correct electrical power supply as specified on the label.
- Do not attempt to remove the product power supply or unplug it from the wall outlet by forcefully pulling on the cord. Disconnect by pulling on the plug only.
- Do not put foreign objects inside the equipment.
- Do not operate equipment with a damaged cord or plug. If in doubt, have the appliance checked by a qualified technician.
- Never remove or tamper with the screws, plugs, cover plates, or grounding leads. Do not put objects of any kind into the air vent.
- Do not block air flow through equipment. Set equipment on a surface where it is not possible to block vents or air flow.
- Do not use equipment in a flammable or explosive environment.
