

Matrix All Fiber Rinse

All Fiber Rinse leaves carpets looking their best. It rinses away every trace of dirt and cleaning solution, leaving behind a residue-free carpet that's squeaky clean and soft to the touch.

- Remove residues
- Neutralize odors
- Leave behind a fresh, floral scent and happy customers

All Fiber Rinse is an acid-based rinse agent that neutralizes odors as it rinses away detergent residue from current and past cleanings. All carpets, from stain-resistant residential carpet to heavily travelled commercial carpet, are left clean, soft, and fluffy with no sticky residue left behind.

All Fiber Rinse can be added to your extractor rinse tank or applied with a sprayer after cleaning (dry vacuum with your extractor after application).

All Fiber Rinse leaves no residue of its own—just a pleasant floral fragrance. As an added bonus, All Fiber Rinse is formulated to be safe on machinery, even when used over and over again. So, it won't clog your jets or add buildup in your solution lines.

All Fiber Rinse not only promotes faster drying of carpets, but it also stabilizes carpet dye faster to prevent bleeding. Your customers will love how quickly their carpets will dry, and they'll wonder how you managed to get the colors to shine through so brilliantly!

For best results, use All Fiber Rinse in conjunction with Matrix Grand Slam. It's the one-two PUNCH that breaks up stubborn dirt and grease, and then rinses it away completely. All that's left is clean carpets, a delightful fragrance, and happy customers that will call you back year after year!

Specifications:

- Eliminates every trace of dirt and cleaning solution residue
- Leaves carpets bright and soft
- pH: 4.0–4.5
- Safe for stain-resistant carpet

Matrix All Fiber Rinse

MATRIX®

Dilutions:

Sprayers: When applying with pump-up or inline sprayer, dilute 4–6 oz per gallon of water.

Extractors: When applying through a portable extractor, dilute 1–2 oz per gallon of water.

Usage:

1. Always pretest in an inconspicuous area for colorfastness.
2. Dilute per instructions listed above and apply to carpet after cleaning.
3. Dry extract with wand.

Left: This is a carpet fiber before cleaning, covered in soil and detergent residue.

Below: Proper cleaning, followed by All Fiber Rinse, removes all traces of soil and residue.
