

Pro's Choice Soil Crystallization products are the cutting edge of low moisture technology for professional cleaners. Brush & Bonnet is designed to be used for (spray and brush) and (bonnet cleaning) procedures.

Dilution: For heavy soil use a dilution ratio of 16 to 1 that's 1 cup per gallon of water. For maintenance cleaning use a dilution of 32 to 1 or 4 ounces per gallon of water.

Application: Thoroughly vacuum area to be cleaned.

Spray and Brush procedure: Brush & Bonnet may be applied using a rotary shampoo machine or using a pump type sprayer. Apply solution to carpet evenly then brush carpet to emulsify soil. Allow carpet to dry completely then vacuum carpet thoroughly to remove encapsulated soil.

Bonnet Extraction cleaning procedure: Work in sections of approximately 100 square feet (10 x 10). Using a pump sprayer evenly apply solution to the area. With a rotary "dry cotton"

bonnet buff the area to extract the soil and solution into the bonnet. Any residual that remains will dry to a non-sticky crystal, which will be removed during normal vacuuming.

Wet Bonnet procedure: submerge cotton bonnet in Brush and Bonnet solution. Wring well and buff carpet surface in overlapping pattern. Rinse and wring bonnet frequently. **SHAKE WELL BEFORE USING**

(1 US GAL. (3.785 L))

BRUSH & BONNET CLEANER

Low Moisture Cleaner

For Professional use only.
Keep away from children.
Read Instructions
and Cautions
on Side Panels.

Caution: Test carpet for color-fastness and usability prior to use.

One Gallon
PH: 8 at 30 to 1 dilution
VOC Compliant

For Professional use only. Keep away from children.

CAUTIONS:
THIS PRODUCT CONTAINS:
Wick Stop™, Diphosphoric acid sodium salt, detergent polymer blend

HEALTH AND SAFETY INFORMATION:

Do not ingest.
Do not get into eyes.
Use in well ventilated area.

EMERGENCY AND FIRST AID

PROCEDURES:
FOR EYE CONTACT: Rinse liberally with water for 15 minutes. If irritation persists contact physician.
FOR INGESTION: Call Physician.
