Self-Neutralizing Urine Odor and Stain Remover.
Spray it on. Walk away.
Easy-to-use. Extremely effective.

Every carpet cleaner has been there – the home with small dogs that leave tiny puddles on the carpet. It’s not enough to penetrate the pad, but it’s enough to leave unsightly yellow stains all over the place. That’s when it’s time to use the stain remover homeowners call by name, “BAD DOG!”

Matrix Bad Dog is one of the most effective, easy-to-use urine stain and odor removers on the market. This acidic, hydrogen peroxide-based cleaner effectively removes tough urine stains on both carpet and upholstery. Plus, its self-neutralizing formula requires no rinsing. So you can apply it, move on to your next job, and let Bad Dog do the work for you.

It really is that simple. Just clean the carpet as usual, and then apply Bad Dog undiluted to the stain. It can take anywhere from 3-8 hours for Bad Dog to completely remove the stain and odor (depending on the temperature of the carpet). Though it’s a slow process, Bad Dog is incredibly effective and is also easier to use than other messy products. Just spray it on and walk away!
Precautions and Usage Instructions

pH: 4.0 • Safe for use on stain-resistant carpet

**Dilutions:**
Apply undiluted.

**Usage Instructions:**
1. Clean carpet as usual with hot water extraction.
2. Apply Bad Dog undiluted to spot.

**Technician Advice:**
It's always best to keep to children and pets away from treated areas. Since Bad Dog needs to be left on the carpet for an extended period of time, we recommend covering spots with plastic after application.

**Caution:**
Always test this and similar products on the textile to be treated in an inconspicuous area and wait the appropriate time to test for colorfastness before proceeding with treatment. This product is not designed for use on natural fibers such as wool or cotton.

**5 Important Questions to Ask Your Customers**

These will help you to better understand the scope of the customer’s problem.

1. Did the customer inherit the problem from someone else?
2. What product has the customer already used on the problem area?
3. How long has the problem existed?
4. Is more than one animal involved?
5. Was the animal confined to one room in particular or did it have free reign of the house?
