

# For Deep-Down Cleaning of Commercial Carpet

## High-Performance Rotary Shampoo

For deep-down cleanings of commercial carpet, Matrix Champion Rotary Shampoo can't be beat. This super-duty rotary shampoo has a higher pH than other products, plus it contains a special blend of detergents that break up oily binders and suspend tough soils.

Champion is so effective, in fact, you won't have to spend much time with pre-spotting chores. Since its powerful formula removes most spots and stains during cleaning, it makes your job a lot easier and saves you a bundle on time and labor costs.

Champion Rotary Shampoo is not approved for use on stain-resistant nylon carpet. Freeze thaw stable.

For maximum cleaning results, we recommend pre-spraying Matrix Grand Slam prior to rotary shampooing, and then using Matrix All Fiber Rinse for the final rinse procedure. The combination of these intense cleaners will deliver clean, soft carpets with that like-new look your customers will love.

solutions

## Dilutions and Usage Instructions

pH: 13.0 • NOT for use on stain-resistant carpet

### Dilutions:

Dilute 8 oz per gallon of water

### Usage Instructions:

**The shampoo method of carpet cleaning** involves applying a high-foaming detergent to the carpet nap through a shower or channel-fed, nylon bristled brush, rotating at a speed recommended by the equipment manufacturer that is safe for the carpet being cleaned. The agitation of the brush creates the foam that suspends the soil. A wet vacuum or extraction machine then extracts the suspended soils and detergents for complete removal. Warning: Brushes not lubricated with shampoo can cause textural damage to the carpet.

### Recommendation:

**1. Vacuum carpet.**

**2. Apply a pre-spray such as Matrix Grand Slam to carpet using a pump-up sprayer.**

**3. Groom pre-spray into carpeting.**

**4. Apply Matrix Champion Rotary Shampoo to carpet using a rotary floor machine with a shampoo brush.**

**5. Extract shampoo with an acid rinse such as Matrix All Fiber Rinse through an extraction machine.**

*Matrix Champion works great with either the Adjust-A-Glide brush (right) or a standard nylon showerfeed brush (below). The Unipro H1715, 17" floor machine makes an excellent rotary shampoo machine when you add a shampoo tank.*
