

UNIPRO 20 AUTO SCRUBBER

HOW IT WORKS

Floors that deal with heavy traffic require regular cleaning that can be tiresome and time-consuming to execute via traditional methods. The UniPro Auto Scrubber was engineered to make the job of cleaning these floors much easier.

The UniPro handles the toughest dirt that ends up on your floor, and will perform daily scrubbing and/or the removal of floor finish to effectively clean and restore floors.

Retail stores, office buildings, schools, and other facilities with a high amount of visitors on a daily basis will count on this practical machine to pick up grease and grime in a single pass!

UNIPRO 20 AUTO SCRUBBER

FEATURES	ADVANTAGES	BENEFITS
Large, 15-gallon solution tank and 17-gallon recovery tank	Improves working efficiency as you can scrub longer between empty and fill cycles	Enjoy less downtime so you can finish jobs quicker
Pad-assist drive	The drive on this unit is brush assisted, but can still be easily pushed with one hand	Boost your productivity as you can clean longer without getting fatigued
Easy operation with ergonomic handle and state-of-the-art controls	Reduces fatigue and speeds up the training process	New members of your team will get up to speed quickly and be able to clean longer without straining their back and arms
Two pad pressure settings: 66 or 99 pounds of pad pressure	You can perform light scrubbing, deep cleaning, or finish removal	Increase your efficiency and output as one machine can handle multiple applications on a job
Easy access to internal components, plus quick-change squeegee blades, pads, and brushes; no tools needed	Less downtime and maintenance needs; quickly change out squeegees, pads, or brushes without tools	Save time and money on replacing parts or performing routine maintenance
