

Matrix Radiant Fine Fabric Shampoo

Tough on dirt – safe on wool, area rugs, and fabrics!

For professional cleaners who prefer to precondition fine fabrics and area rugs by using a shampoo formula, Radiant is the new chemistry of choice.

Radiant's superior chemistry works as well as high-pH shampoos without the risk of damaging delicate wool fibers. It works well with a low-moisture cleaning system, such as rotary or dry foam cleaning, and is an excellent alternative to dry cleaning solvents.

This product is a must-have for rug spas and in-plant cleaning companies that need a safe and effective way to clean Oriental and area rugs.

- Great for sisal and other cellulosic rugs
- pH: 5.0-6.0
- Safe on wool
- Dilution: 3-5 oz per gallon of water
